SOCRATES

Think Deep. Act Fast.

An end-to-end AI-Powered SOC Assistant

Netcompany

@githappens

THE CHALLENGE

- Security teams are overwhelmed by log volume
- Alert fatigue and delayed response
- Hard to bridge monitoring to real remediation

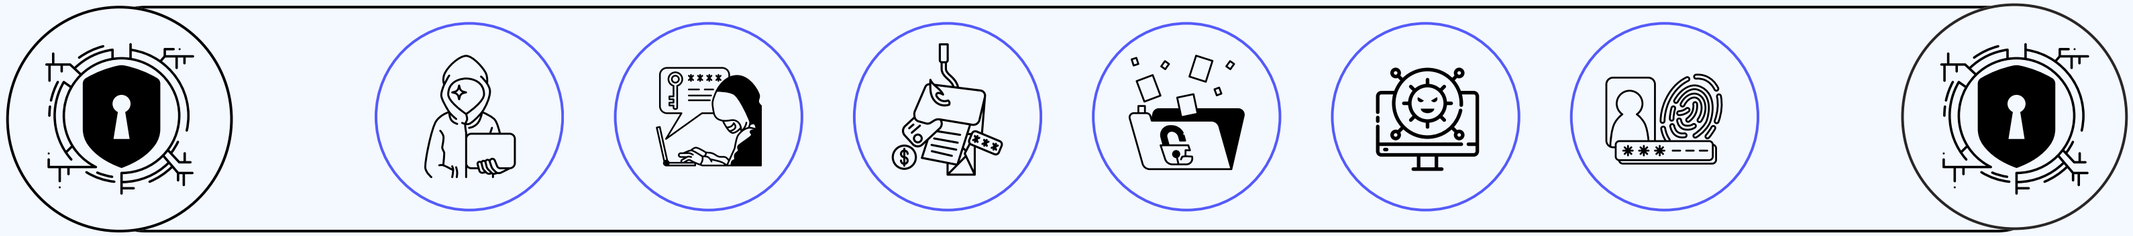
SOCRATES OFFERS

- Universal and Centralised Log Ingestion
- Efficient AI-Powered Log Analysis
- Chat-Enabled AI Actions
- Comprehensive Security Reporting
- One-Click Mitigation to Possible Attacks

WHAT SOCRATES DOES

Vendor-Agnostic Syslog Injestion

- Non-blocking ingest path to internal queue
- Self-improving parser behavior across runs
- Device network automatically builds from traffic
- Dedicated DB writer flushes on batch-size or timer.

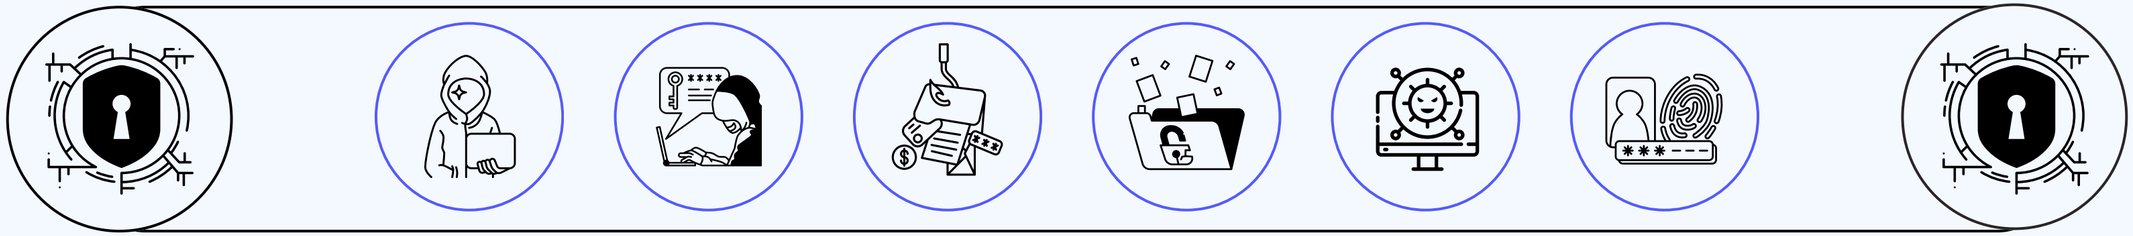


WHAT SOCRATES DOES

Vendor-Agnostic Syslog Injestion

Runs three-tier AI analysis

- Every batch triggers AI triage for threat signals
- Suspicious items get deep reasoning analysis
- Mitigation steps are validated through further analysis

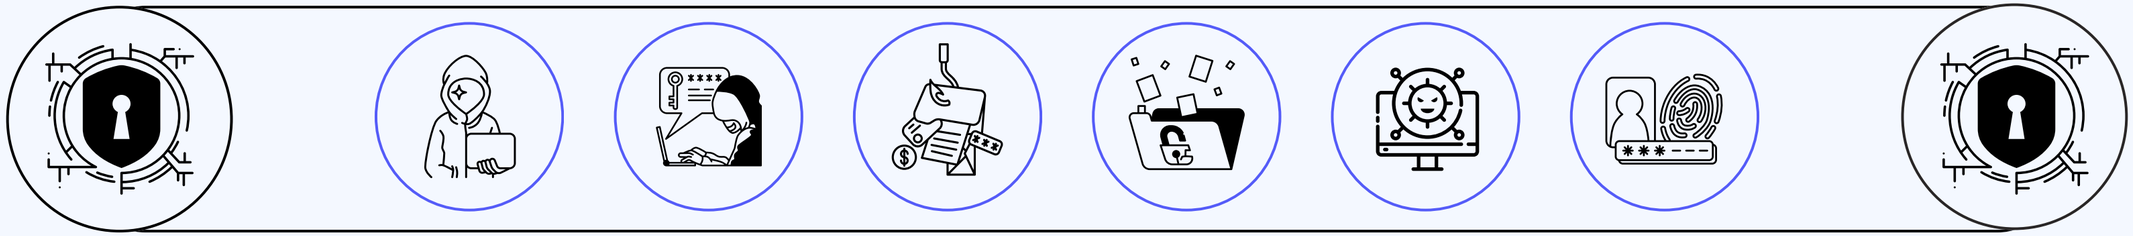


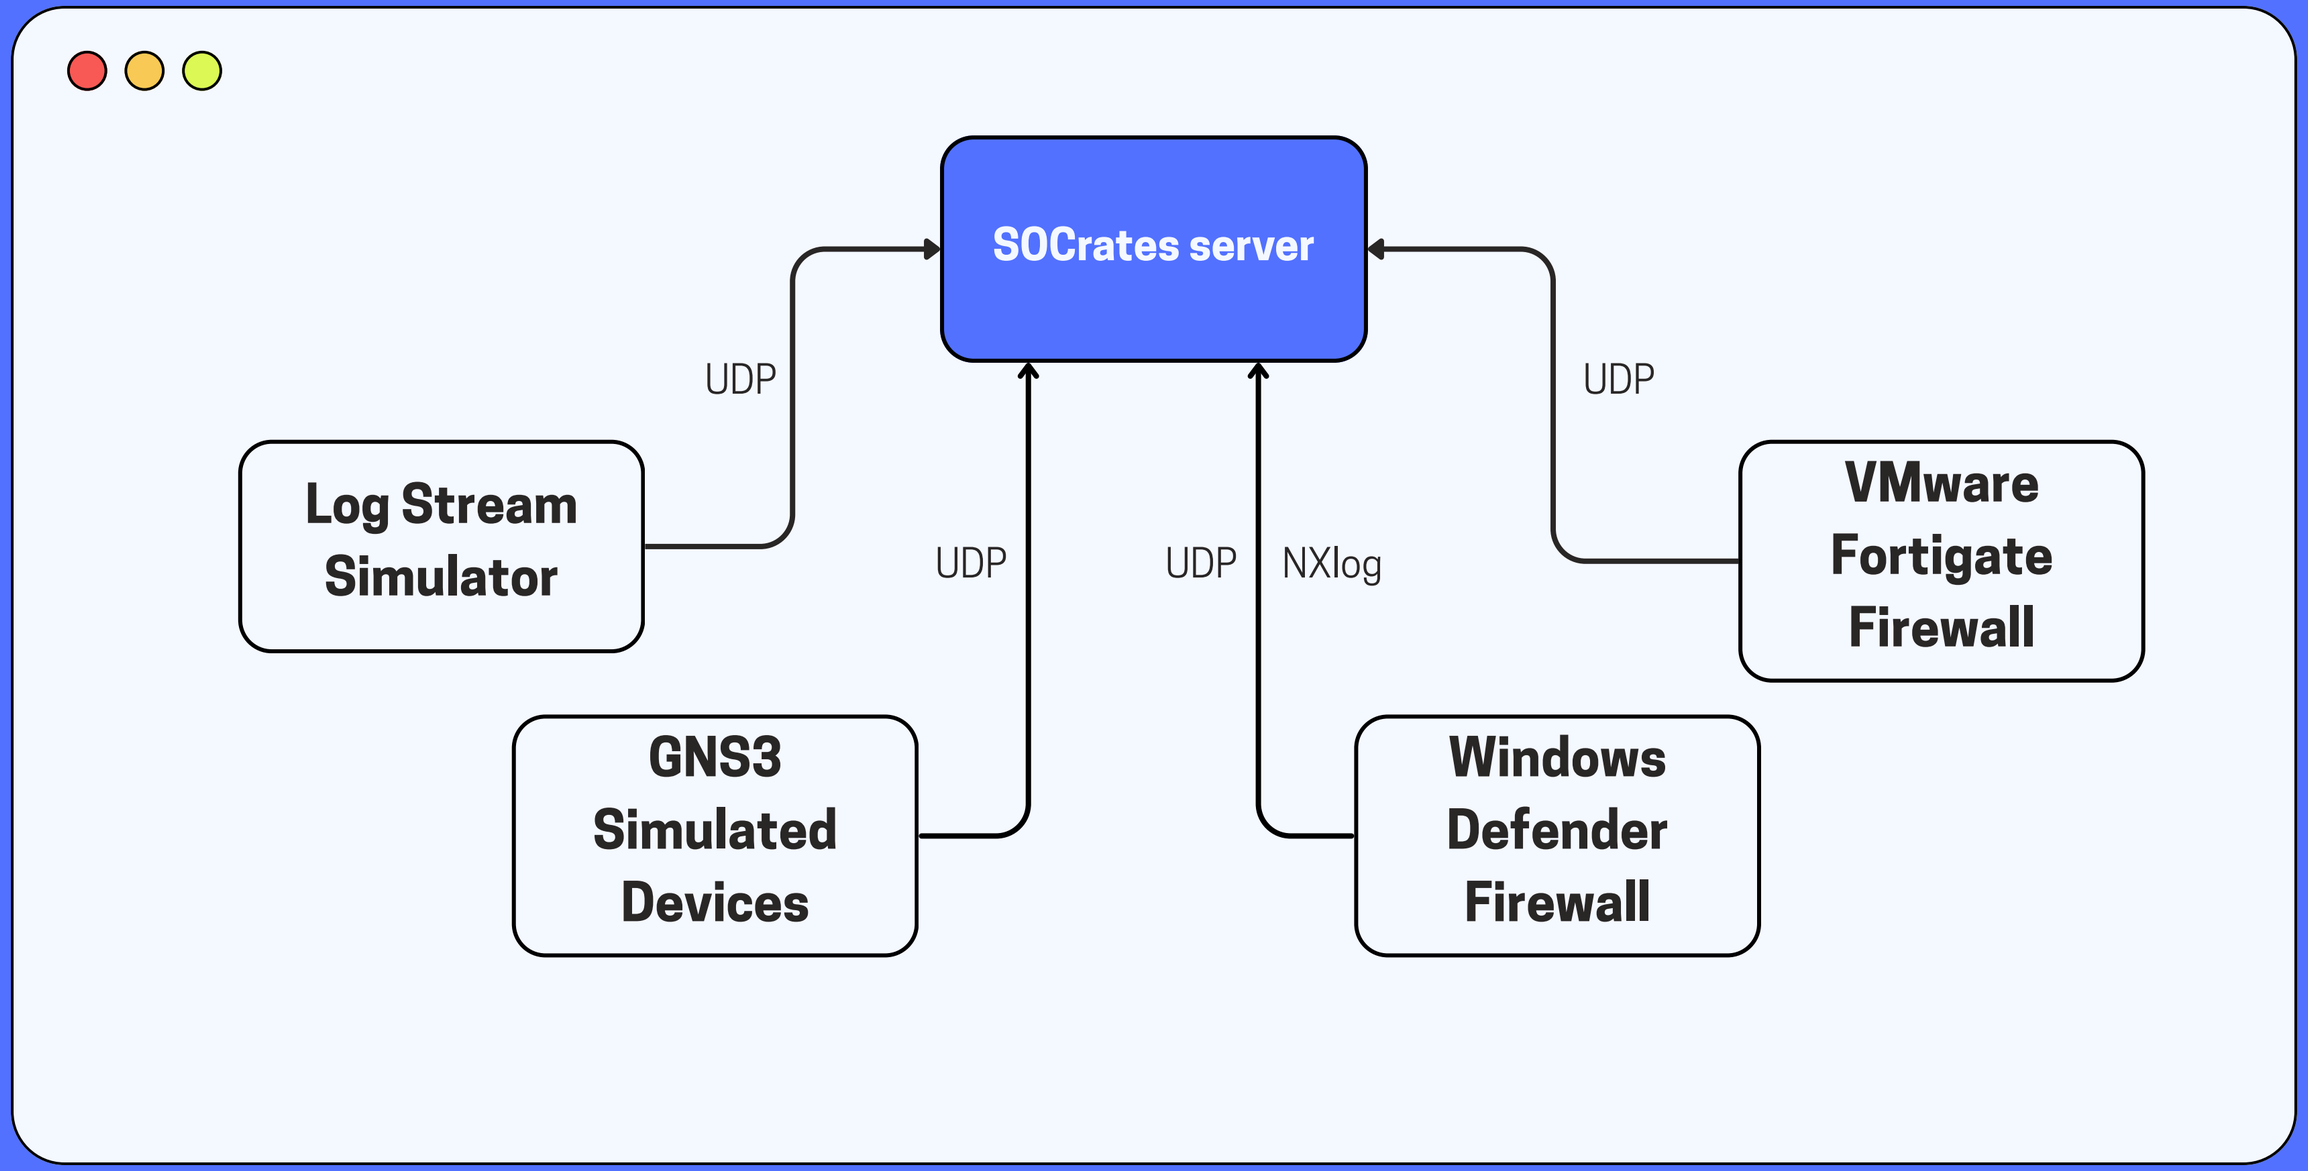
WHAT SOCRATES DOES

Vendor-Agnostic Syslog Injestion

Runs three-tier AI analysis

Provides alerts, mitigations & SOAR actions





SOCrates server

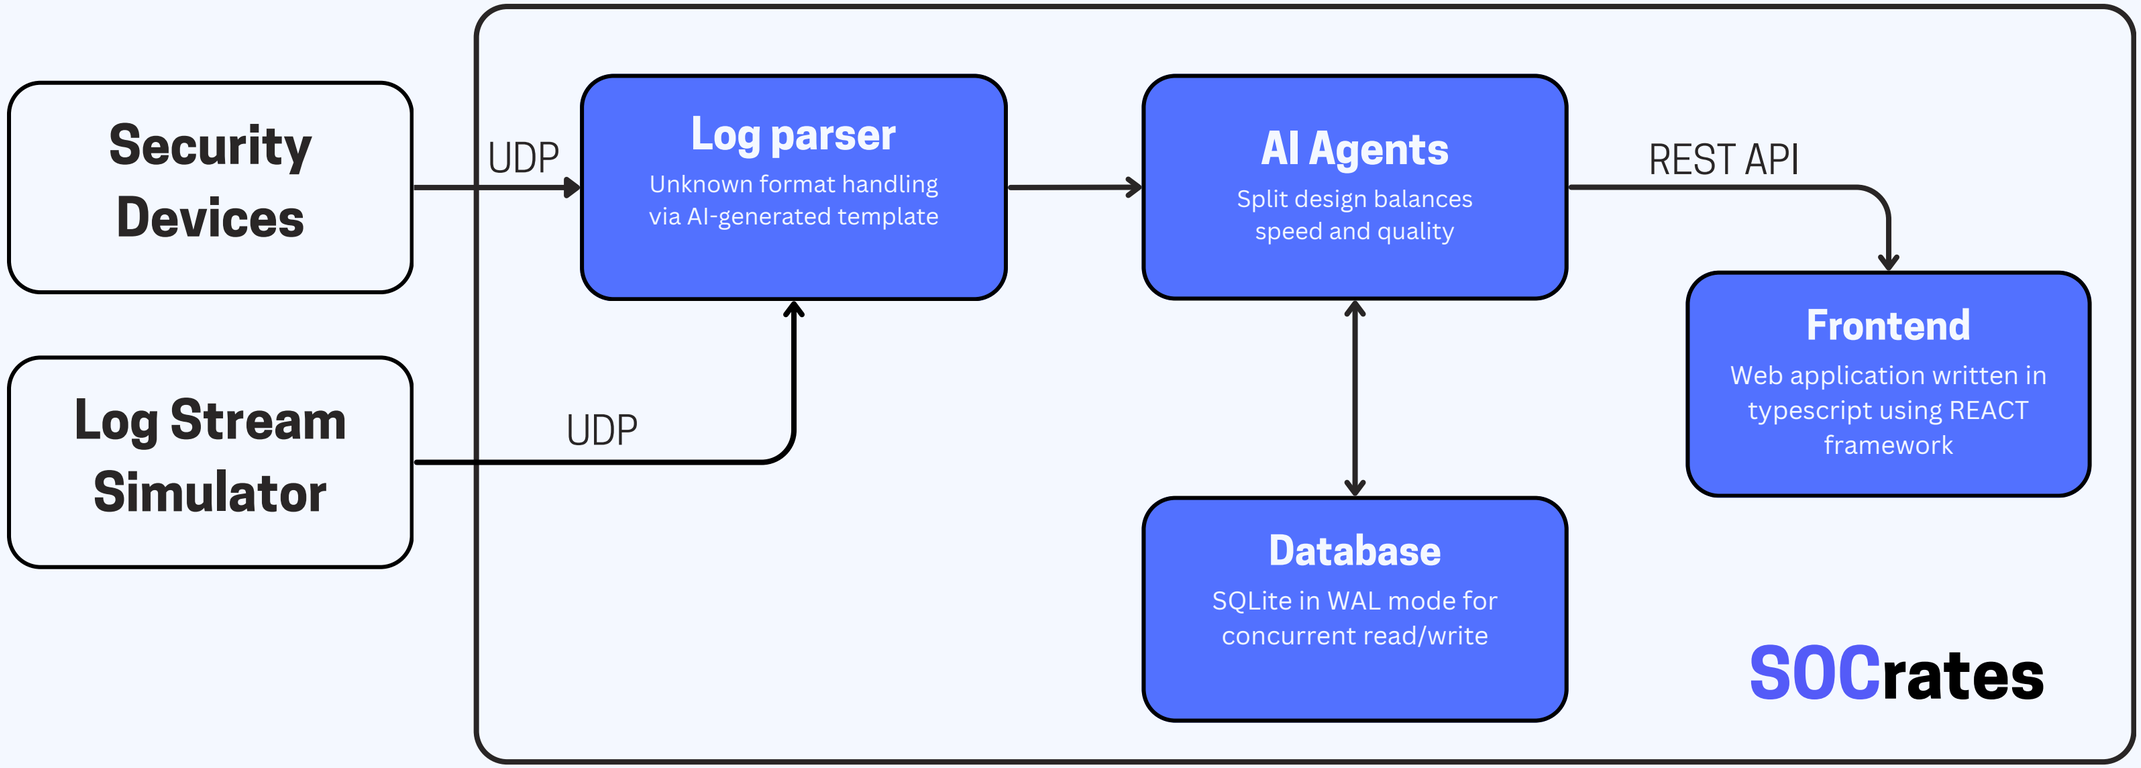
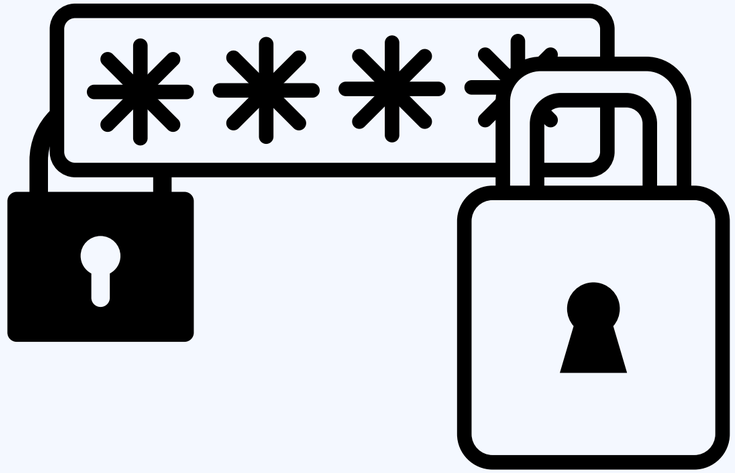
Log Stream Simulator
UDP
GNS3 Simulated Devices
UDP
NXlog
Windows Defender Firewall
UDP
VMware Fortigate Firewall

ARCHITECTURE



THE KEY TO OUR AGENTIC WORKFLOW

- Infinite Context by using Retrieval-Augmented Generation (RAG)
- Guaranteed Structured Outputs
- Native Tool Calling
- Autonomous Evaluation



WINDOWS SERVER SOAR ACTIONS

TESTED ON A LOCAL MACHINE AND PERFORMING AUTONOMOUS ACTIONS SUCH AS:

- **OPENING/CLOSING** A SPECIFIC **PORT** FOR EIHER **UDP**, **TCP** OR BOTH FOR PROTOCOLS IN WINDOWS FIREWALL
- **BLOCKING/UN-BLOCKING** A SPECIFIC **IP** IN WINDOWS FIREWALL
- **KILLING** SPECIFIC **PROCESSES** THAT MAY RUN ON THE WINDOWS SERVER AND BE DEMEED **DANGEROUS** BY THE **AI**
- **QUARANTINE** A SPECIFIC **FILE** IN THE WINDOWS SERVER, **DISABLING** ALL **ACCESS** TO IT

FORTIGATE FIREWALL SOAR ACTIONS

TESTED USING THE PROVIDED VM USING VMWAREAND PERFORMING AUTONOMOUS ACTIONS SUCH AS:

- **OPENING/CLOSING** A SPECIFIC **PORT** FOR EIHER **UDP**, **TCP** OR BOTH FOR PROTOCOLS IN WINDOWS FIREWALL
- **BLOCKING/UN-BLOCKING** A SPECIFIC **IP** IN WINDOWS FIREWALL
